

Coffee Shop Sales Analysis Report

Project Overview: This dashboard provides a comprehensive analysis of the **Coffee Shop Sales** dataset. It covers sales performance across three locations (Astoria, Hell's Kitchen, and Lower Manhattan) for the first half of 2023.

Project Objectives: The main objective of this project is to analyse retail sales data to gain actionable insights that will enhance the performance of the Coffee Shop.

1. Executive Summary (KPIs)

- **Total Revenue:** \$698,812.33
- **Total Footfall:** 149,116
- **Avg. Transaction Value:** \$4.69 (Bill per person)
- **Avg. Items per Transaction:** 1.44 (Order per person)

2. Temporal Analysis (Sales by Time & Day)

Q1: How do sales vary by day of the week and hour of the day?

- **Finding:** Sales follow a classic morning-heavy pattern. Activity begins at 6 AM and peaks sharply between **8 AM and 10 AM**. There is a secondary minor plateau during lunch hours before tapering off in the evening.
- **Finding:** Fridays are the most active days for orders, while Sundays experience the lowest volume.

Q2: Are there any peak times for sales activity?

- **Answer:** The "Golden Window" for this business is **Weekdays (specifically Monday and Friday) between 8:00 AM and 10:00 AM**.

3. Revenue Segmentation

Q3: What is the total sales revenue for each month?

- **Answer:** The total revenue for the H1 period (Jan–June) is **\$698,812.33**.
- **Note:** In a live dashboard, the month-over-month growth would be calculated here to show if the business is scaling.

Q4: How do sales vary across different store locations?

- **Answer:** **Hell's Kitchen** and **Lower Manhattan** are the primary revenue drivers. **Astoria**, while profitable, shows slightly lower footfall and sales volume, suggesting it may be a smaller residential location compared to the high-traffic urban hubs.

4. Product & Category Performance

Q5: Which products are the best-selling in terms of quantity and revenue?

- **Top 3 by Revenue:**
 1. **Barista Espresso:** \$91,406.20
 2. **Gourmet Brewed Coffee:** \$77,081.95
 3. **Hot Chocolate:** \$72,416.00
- **Insight:** Premium espresso-based drinks are the core revenue engine for the shop.

Q6: How do sales vary by product category and type?

- **Answer:** **Coffee** dominates the product mix at **40%**, followed by **Tea** at **29%**. Together, they account for nearly 70% of all sales.
- **Cup Size Preference:** Customers show a strong preference for **Large** and **Regular** sizes. "Small" sizes represent the lowest share of the volume.

5. Strategic Recommendations (The "So What?")

Based on the data above, the following actions are recommended:

1. **Staffing Optimization:** Increase staff shifts between 7:30 AM and 10:30 AM to handle the 8 AM peak and reduce wait times.
2. **Upselling Strategy:** Since the average order per person is only 1.44 items, launch a "Coffee + Bakery" bundle to increase the **Avg. Bill / Person** above \$5.00.
3. **Weekend Promotion:** Introduce "Sunday Brunch Specials" or loyalty points multipliers on Sundays to boost the week's slowest day.
4. **Inventory Management:** Ensure higher stock of "Large" cups and Barista Espresso beans, as these are the high-velocity items.

6. Technical Stack Used

- **Data Cleaning:** Power Query / Excel
- **Analysis:** Pivot Tables & DAX measures
- **Visualization:** Excel Dashboard (utilizing Slicers for interactivity)
